A Case Study in Kick-Ass Gym Audio

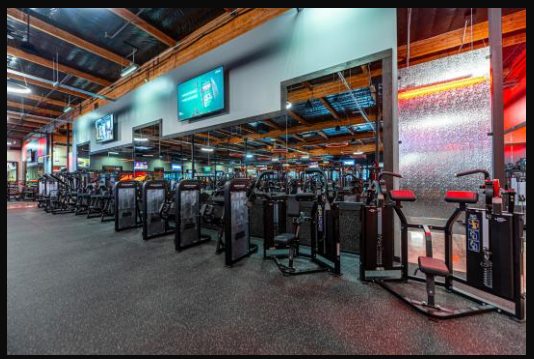

FITNESS 19 RENTON | 3208 NE Sunset Blvd, Renton, WA 98056

Hit hard from the first rep

Your gym should sound as serious as the people training in it. Sharp musical detail. Bass you feel in your chest. Energy that commands the floor. Fitness 19 Renton sets the stage for EPIC's approach: build the sound into the space, then dial it in.

Built to hit hard

EPIC engineering behind the impact

Big sound takes a complete system. Processing sets the control. Amplifiers deliver the power. Speakers and subs bring the impact. This illustrative EPIC design puts every component to work.

ASHLY Community biamp.

iPad Control for Ashly NE24

Ashly ne24.24m handles the processing. The custom Ashly iPad interface puts Spotify and Aux selection, zone volume and separate subwoofer levels at your fingertips, with lobby and locker-room controls on the settings screen.

Put real power behind the music

Ashly MA250.8 supplies eight channels for distributed speakers. EcoTour 1500.4 provides four amplifier channels for the subwoofer system.

Bring the detail and the punch

Biamp Desono DP8 8-inch pendant loudspeakers serve open ceilings. Desono CM60DTD 6.5-inch ceiling loudspeakers serve finished ceilings.

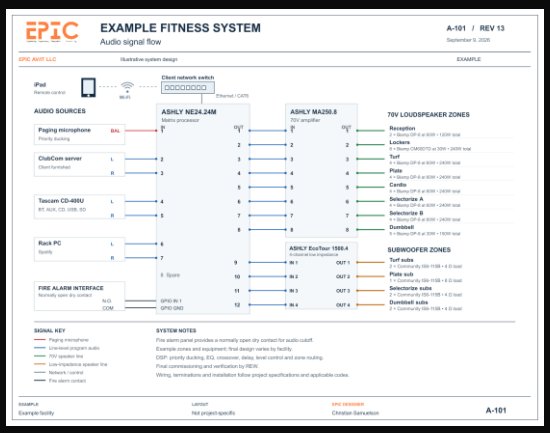

Community IS6-115 15-inch subwoofers add low-frequency weight and physical impact. Community is a Biamp loudspeaker family.

Dial it in and make it count

EPIC measures, aligns and tunes the system for the room: speakers, subs, equalization, delay and zone levels. Then we check paging and put the music to the test.
